

A GIFT HAS
BEEN GIVEN
IN YOUR
HONOR

HOPE FOR A HEALTHY BABY

A gift has been given in your name to share hope with a young mother in Africa.

Hopeful for her baby's future, this gift feels like a small miracle to her – it enables her to hear her baby's heartbeat! Fetal dopplers allow health workers to monitor the heart rate of a developing baby, reassuring mothers when all is well, and sometimes helping identify possible complications in their pregnancy. This gift helps equip health centers with instruments like fetal dopplers and encourages young women to seek prenatal care, greatly increasing their chances of safely delivering a healthy baby.
